

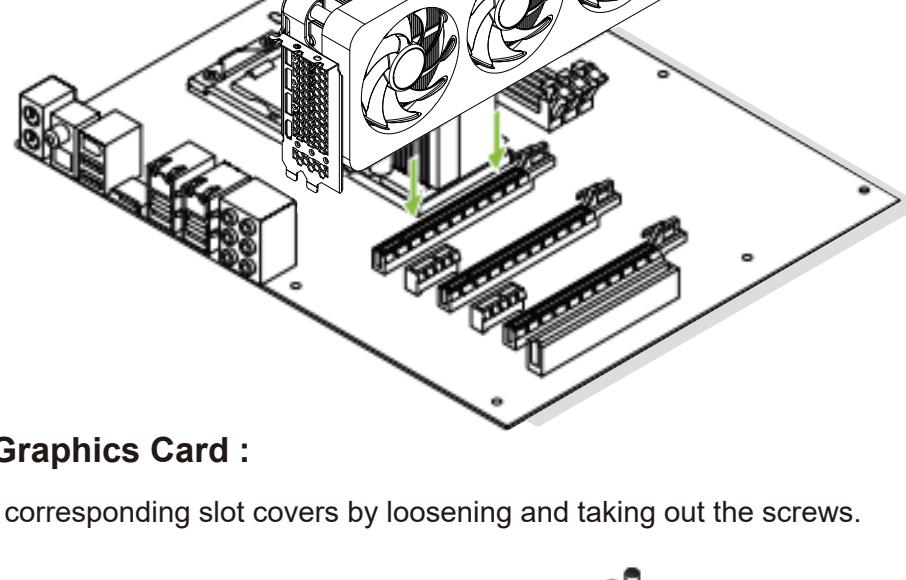

GRAPHICS CARD INSTALLATION GUIDE

Welcome to the Palit Family! Your Palit Graphics Card unlocks an ultimate gaming experience and seamless performance. Follow this guide for easy installation and optimization.

HARDWARE INSTALLATION

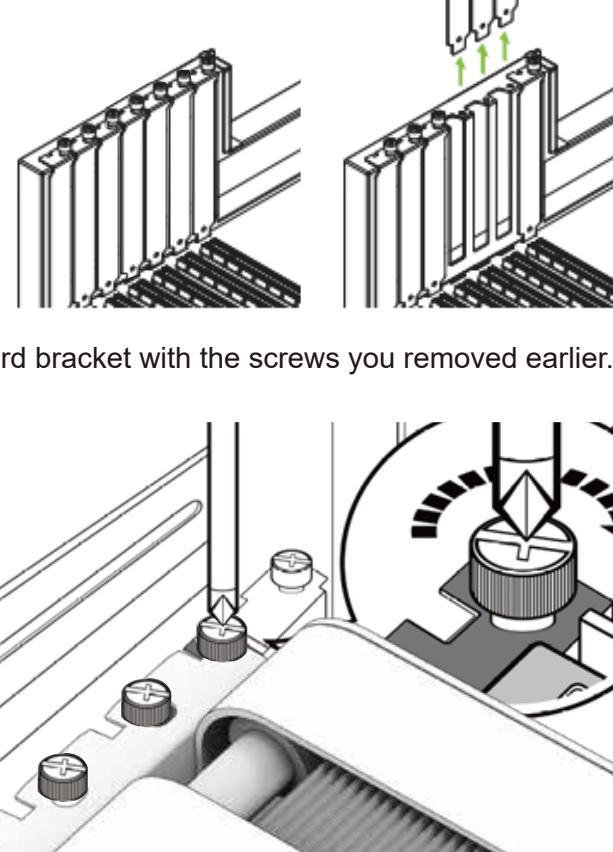

1 Insert the Graphics Card :

- Locate the primary PCI Express x16 slot on your motherboard.
- Insert the graphics card securely into the slot.

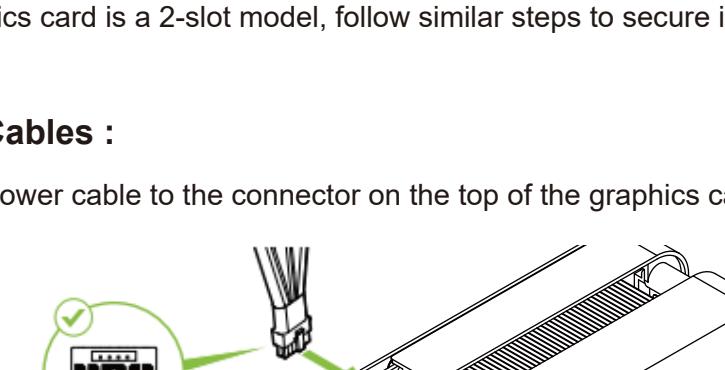

2 Secure the Graphics Card :

- Remove the corresponding slot covers by loosening and taking out the screws.

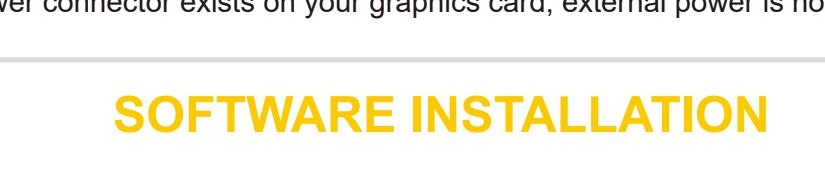

- Mount the graphics card bracket with the screws you removed earlier.

- Note: If your graphics card is a 2-slot model, follow similar steps to secure it.

3 Connect Power Cables :

- Attach the 16-pin power cable to the connector on the top of the graphics card.

- If your graphics card uses an 8-pin power connector, connect the 8-pin cable instead.
- Note: If no power connector exists on your graphics card, external power is not required.

SOFTWARE INSTALLATION

1 Install NVIDIA APP :

- Visit <https://www.nvidia.com/en-us/software/nvidia-app/>
- Click **Download Now** and follow the prompts to install the software.
- Accept the NVIDIA Software License Agreement by selecting **Agree and Continue**.
- Once the installation is complete, click **Close**.
- For more information, please visit **Learn More** page in NVIDIA official website.

2 Download Palit ThunderMaster :

- ThunderMaster enables advanced monitoring and performance optimization, including:
 - GPU Temperature and Frame Rate Target control.
 - Intelligent monitoring with NVIDIA GPU Boost technology.
- Download it from www.palit.com/TM.

SAFETY INSTRUCTIONS

To ensure safe usage and installation :

- Disconnect your computer's power source before starting installation.
- Keep the product away from water or wet conditions.
- Ensure ventilation slots are not obstructed.
- Avoid placing the product near heat sources such as radiators.
- Place the product on a stable, flat surface to prevent falls or damage.
- Keep the power cord free from obstructions or tripping hazards.
